

A COMPLETE SOLUTION FOR DESIGNING PRINT PROJECTS WITH 3D AND SPECIAL EFFECTS

HumanEyes Creative3D* revolutionises the creation of 3D printed content: designers can now independently and easily create their own special effects projects and pass those jobs on for easy output by professional printers.

* For MAC OS X only

1 CHOOSE ANY 2D IMAGE

Open any 2D image in JPEG, TIFF or PSD format... Or take your own shot using a single standard digital camera.

2 SEPARATE THE LAYERS AND COMPLETE THE BACKGROUND

Use one of our specialized matting tools to separate your picture into several layers. Then, fill-in the holes in background using the In-Painting tool.

3 ADD LENTICULAR EFFECTS TO YOUR LAYERS

Add the effects you'd like to see in the image: 3D, animation, flip and/or zoom.

4 PRINT A PREVIEW

Print a preview of your project on a 5*7", 40 LPI lens media (HumanEyes offers a special lenses kit).

Limitless applications ranging from POP to advertising media, posters, backlit signs, product packaging, plastic cards, greeting cards and lots more...
